

White Balance Practice

Contact Sheet Due Date **Monday, September 24**

Summary

The Photo II students will take a variety of pictures using different light and making adjustments with the White Balance setting on the camera.

Final Product

Students will turn in a contact sheet with an explanation of what they did and what they found out about White Balance and its affect on photos.

The Details

Upon receiving the White Balance Article students will take it home and read it for homework. The next day at school students will go to different parts of the school that have different lighting and try to take pictures making adjustments in White Balance. While taking these photos it will be good to try different setting to see how it affects the overall picture.

You need to go to a minimum of **SIX** different locations around school that you can use: Incandescent, Fluorescent, Shade, Cloudy, and Direct Sunlight settings. You need to take a minimum of **SEVEN** photos at each location (one for each WB setting on the camera - try different settings for different situations).
